

## PUBLICATIONS

- Cancino, C., & Lorig, L. (2025). Simulation of Slope Movements at Aknes using 2D Distinct Element Modeling. *Eurock 2025 (Proceedings, ISRM International Symposium, Trondheim, Norway, June 2025)*.
- Cancino, C., M. Fuenzalida, and C. Kamp. (2024). Numerical modeling of cave propagation and breakthrough timing: A back-analysis at New Afton Mine. In *Proceedings, Ninth International Conference and Exhibition on Mass Mining (MassMin 2024, Kiruna, Sweden, September 2024)*.
- Cancino, C., C. Alvarez, and R. Jara. (2024). Subsidence Analysis of the SW Sector at El Teniente Mine. In *Proceedings, Ninth International Conference and Exhibition on Mass Mining (MassMin 2024, Kiruna, Sweden, September 2024)*.
- Cancino Martinez, C. F. (2024). *The impact of fracture size distribution on primary fragmentation estimates in cave mines* [Master's Thesis, University of British Columbia].
- Cancino, C., Lorig, L., Bu, J., & Bar, N. (2024). Back-analysis for more reliable mine plans at Pueblo Viejo Gold Mine. *Slope Stability 2024 (Nova Lima, Brazil, April 2024)*.
- Furtney, J., Cancino, C., Silva, R., & Thielsen, C. (2024). Slope Design Curves with Machine Learning. *Slope Stability 2024 (Nova Lima, Brazil, April 2024)*.
- Cancino, C., Lorig, L., Lucarelli, A., Gabanakgosi, K., & Barei, O. M. (2023). Slope support analysis at Jwaneng Mine. *Challenges in Rock Mechanics & Rock Engineering (Proceedings, 15th International ISRM Congress)*.
- Cancino, C., Fuenzalida, M. A., & Kamp, C. (2022). Modelling Considerations for Cave Compaction at New Afton Mine. In *Caving 2022 (Proceedings, International Conferences on Block and Sublevel Caving, Adelaide, Australia, Aug. 30-Sept. 1, 2022)*, 573–582. Perth: Australian Centre for Geomechanics.
- Cancino, C., Lorig, L., Siburian, P., Coutinho, P., & Tejada, L. C. (2022). Application of a Strain-Softening Model to Simulate Slope Displacements at Freeport-McMoRan Morenci Mine. In *Proceedings, International Slope Stability Symposium (Tucson, Arizona, October 2022)*.
- Cancino, C. F., Silva, R., & Giraud, C. (2021). Numerical assessment of an overall instability at Bajo de la Alumbrera Mine. In *SSIM 2021 (Proceedings, Second International Slope Stability in Mining, Perth, Australia, October 2021)*, 27–36, P. M. Dight, Ed. Australian Centre for Geomechanics, Perth.
- Ghazvinian, E., Garza-Cruz, T., Bouzeran, L., Fuenzalida, M., Cheng, Z., Cancino, C., & Pierce, M. (2020). Theory and Implementation of the Itasca Constitutive Model for Advanced Strain Softening (IMASS). In *MassMin 2020 (Proceedings, Eight International Conference & Exhibition on Mass Mining, Virtual Conference, December 2020)*, 451–461. Santiago: University of Chile.
- Cancino, C., Alvarez, C., Gomez, P., Cavieres, P., Jara, R., Figueroa, C., & Millan, J. (2019). Subsidence Analysis of Waste Dumps Located inside an Active Caving Crater. In *Proceedings, ISRM 14th International Congress of Rock Mechanics (Iguassu Falls, Brazil, September 2019)*, 2974–2986. ISRM.

Cancino, C., Alvarez, C., Orrego, C., Diaz, M., Ledezma, R. (2018). Applicability of Strain Softening Models to Slope Stability Analyses. In *Proceedings, International Symposium on Rock Slope Stability in Open Pit Mining and Civil Engineering, Seville, Spain, April 2018*.
