

PUBLICATIONS

Coulibaly, J. B., & Reedlunn, B. (2024). A constitutive model for crushed salt pressure solution creep based on an orthorhombic unit cell with contact face intersection. In *Proceedings, 11th Conference on the Mechanical Behavior of Salt (Santa Fe, New Mexico, July 2025)*.

Coulibaly, J. B., & Reedlunn, B. (2024). Influence of water content on crushed salt pressure solution creep rates: A capillary condensation and sorption model. In *Proceedings, 11th Conference on the Mechanical Behavior of Salt (Santa Fe, New Mexico, July 2025)*.

Coulibaly, J. B., Clemmer, J., & Buarque de Macedo, R. (2024). Modeling shock attenuation in granular materials: The role of particle shape. In *Proceedings, Engineering Mechanics Institute Conference (Chicago, May 2025)*.

Friedenberg, L., Bartol, J., Bean, J. E., Beese, S., de Bresser, H.J.P., Coulibaly, J. B., Czaikowski, O., Düsterloh, U., Eickemeier, R., Gartzke, A., Hangx, S., Jantschik, K., Laurich, B., Lerch, C., Lerche, S., Liu, W., Lüdeling, C., Mills, M. M., ... Zemke, K. (2024). KOMPASS-II: Compaction of Crushed salt for Safe Containment – Phase 2. <https://doi.org/10.2172/2430146>

Specht, P., Ivanoff, T., ... Coulibaly, J. B., ... Silling, S. (2024). Addressing the Qualification of Additive Manufactured Metals Through Improved Meso-Scale Simulations and Validation Experiments: FY2024 Status Report (Technical Report, under internal review). Sandia National Laboratories. Albuquerque, NM and Livermore, CA. (Report number: under internal review)

Coulibaly, J. B., Cundiff, K., Hamel, C., & Long, K. (2024). Calibration of a hyperelastic-damage model for a legacy Sylgard 184 / glass microballoon composite at room temperature. Sandia National Laboratories Memo No. SAND2024-10485CTF. Albuquerque, NM and Livermore, CA.

Long, K. N., Coulibaly, J. B., Cundiff, K., Hamel, C., Carroll, J., Jin, H., & Brown, J. (2024). Constitutive modeling of elastomeric syntactic foams for large deformation mechanical environments. In *Proceedings, International Mechanical Engineering Congress & Exposition (Portland, Oregon, November 2024)*.

Coulibaly, J. B. (2023). An assessment of Callahan's crushed salt constitutive model. Sandia National Laboratories Memo No. SAND2023-06049R. Albuquerque, NM and Livermore, CA.

Coulibaly, J. B., & Rotta Loria, A. F. (2022). Transient dynamics of the thermally induced deformation of sands. *International Journal for Numerical and Analytical Methods in Geomechanics*, 46(10), 1972–1988.

Pan, Y., Coulibaly, J. B., & Rotta Loria, A. F. (2022). An experimental investigation challenging the thermal collapse of sand. *Géotechnique*, 74(3), 296–306.

Rotta Loria, A. F., & Coulibaly, J. B. (2021). Thermally induced deformation of soils: A critical overview of phenomena, challenges and opportunities. *Geomechanics for Energy and the Environment*, 25, Article 100193. <https://doi.org/10.1016/j.gete.2020.100193>

Pan, Y., Coulibaly, J. B., & Rotta Loria, A. F. (2020). Thermally induced deformation of coarse-grained soils under nearly zero vertical stress. *Géotechnique Letters*, 10(4), 1–6.

Coulibaly, J. B., Shah, M., & Rotta Loria, A. F. (2020). Thermal cycling effects on the structure and physical properties of granular materials. *Granular Matter*, 22, Article 80.

Hatami-Marbini, H., & Coulibaly, J. B. (2020). Colloidal particle gel models using many-body potential interactions. *Phys. Rev. E*, 101(2), 020601. <https://doi.org/10.1103/PhysRevE.101.020601>

Dugelas, L., Coulibaly, J. B., Bourrier, F., Lambert, S., Chanut, M.-A., Olmedo, I., & Nicot, F. (2019). Assessment of the predictive capabilities of discrete element models for flexible rockfall barriers. *International Journal of Impact Engineering*, 133. <https://doi.org/10.1016/j.ijimpeng.2019.103365>

Coulibaly, J. B., Chanut, M.-A., Lambert, S., & Nicot, F. (2019). Toward a generic computational approach for flexible rockfall barriers modeling. *Rock Mechanics and Rock Engineering*.

Coulibaly, J. B., Chanut, M.-A., Lambert, S., & Nicot, F. (2018). Sliding cable modeling: An attempt at a unified formulation. *International Journal of Solids and Structures*, 130–131, 1–10.

Coulibaly, J. B., Chanut, M.-A., Lambert, S., & Nicot, F. (2017). Non-linear discrete mechanical model of steel rings. *Journal of Engineering Mechanics*, 143(9).

Coulibaly, J. B., & Rotta Loria, A. F. (2021). Microstructural dynamics of thermally induced creep in cohesionless soils. In *Proceedings, Biot-Bazant Conference (Evanston, Illinois, June 2021)*.

Chanut, M.-A., & Coulibaly, J. B. (2018). Numerical investigation of rockfall barriers under realistic on-site impacts. In *Proceedings, International Symposium Rock Slope Stability 2018 (November 2018)*.

Dugelas, L., Coulibaly, J. B., Bourrier, F., Olmedo, I., Chanut, M.-A., Lambert, S., & Nicot, F. (2018). Comparison of two DEM modeling of flexible rockfall fences under dynamic impact. In *Proceedings, International Symposium Rock Slope Stability 2018 (November 2018)*.

Coulibaly, J. B., Chanut, M.-A., Galandrin, C., Olmedo, I., Lambert, S., & Nicot, F. (2017). Generic modeling of flexible rockfall barriers: From components characterization to full-scale numerical simulations. In *Proceedings, RocExs 2017 — 6th Interdisciplinary Workshop on Rockfall Protection (May 2017)*.

Olmedo, I., Robit, P., Bertrand, D., Galandrin, C., Coulibaly, J. B., & Chanut, M.-A. (2017). Extended experimental studies on rockfall flexible fences. In *RocExs 2017 — 6th Interdisciplinary Workshop on Rockfall Protection (May 2017)*.

Coulibaly, J. B., Chanut, M.-A., Lambert, S., & Nicot, F. (2016). Generic modeling of rockfall catch fences under impacts. In *Proceedings, International Symposium Rock Slope Stability 2016*.
