

## PUBLICATIONS

**Benedek**, Kalman, Zoltan Pecskey, Csaba Szabo, Jozsef Josvai and Tibor Nemeth. Paleogene Intrusive and Effusive Igneous Rocks in the Zala Basin Shear Zone (Western Hungary): Link to the Paleogene Magmatic Activity Along the Periadriatic Lineament. *Geologica Carpathica*, 55 (2004), 43-50.

Balla, Zoltan, Istvan Horvath, Gyorgy Toth, Kalman **Benedek**, Gyula Mezo and Peter Molnar. Hydrogeological Pattern of the Bataapati (Üveghuta) Site. *Annual Report of the Geological Institute of Hungary*, 2004 (2004), 449-472.

Kovacs, Istvan, Laszlo Csontos, Csaba Szabo, Eniko Bali, Gyorgy Falus, Kalman **Benedek** and Zoltan Zajacz. Paleogene-early Miocene Igneous Rocks and Geodynamics of the Alpine-Carpathian-Pannonian-Dinaric Region: An Integrated Approach. *Geological Society of America Bulletin*, Special Paper. 418 (2007), 93-112.

**Benedek**, Kalman, Zoltan Bothi, Gyula Mezo and Peter Molnar. Compartmented Flow at the Bataapati Site in Hungary. *Hydrogeology Journal*, 17 (2009), 1219-1232.

**Benedek**, Kalman and Gyula Danko. Stochastic Hydrogeologic modelling of fractured rocks: a Generic Case Study in the Mórággy Granite Formation, South Hungary. *Geologica Carpathica*, 60 (2009), 271-281.

**Benedek**, Kalman, Gyula Mezo, Zsafia Szabo, Peter Molnar, Zoltan Bothi, Janos Geiger, Tibor Sidlo and Gyula Danko. The Hydrogeological Modelling of the Bataapati Site. *Annual Report of the Geological Institute of Hungary*, 2009 (2010), 149-165.

**Benedek**, Kalman and Peter Molnar. Combining structural and hydrogeological data: Conceptualization of a fracture system. *Engineering Geology*, 163 (2013), 1-10.

**Benedek**, Kalman, Zsolt Nagy, Istvan Dunkl, Csaba Szabó and Sandor Józsa (2001): Petrographical, geochemical and geochronological constraints on igneous clasts and sediments hosted in the Oligo-Miocene Bakony Molasse, Hungary: evidence for a Paleo-Drava River system. *Int J Earth Sciences (Geol Rundsch)*, 90, 519-533.

**Benedek**, Kalman, Zoltan Pécskay, Csaba Szabó, Jozsef Jósmai, Tibor Németh (2004): Paleogene igneous rocks in the Zala Basin (Western Hungary): link to the Paleogene magmatic activity along the Periadriatic Lineament. *Geol Carpathica*, 55, 43-50.
