

Robert Swindell

Ittner, H., C. Iskender, M. Roslin, R. Swindell, and L. Martinsson. “Expansion of the Stockholm metro: Case study of the passage of a fracture zone”, in ***Proceedings World Tunnel Congress 2022 (Copenhagen, Denmark, September 2022)***, ITA-AITES, 2022.

Swindell, R., F. Johansson, I. Kjellström, and M. Benhalima. “Rock mass characterization – Systematic errors and how they can be avoided”, in ***Proceedings, Bergmekanikdag 2017 – Föredrag (Stockholm, March 2017)***, Stockholm: Stiftelsen Bergteknisk Forskning — BeFo, 2017.

Swindell, R., G. Manell, and M. Christiansson. “Rock engineering challenges and excavation methods at the City Line, Station City, Stockholm”, in ***Proceedings, 7th Nordic Grouting Symposium and 2nd Nordic Rock Mechanics Symposium (Gothenburg, Sweden, November 2013)***.

Swindell, R., M. Holmberg, L. Rosengren, and M. von Matérn. “Application of the active design concept for City Line contract Norrströmstunneln”, (in Swedish) in ***Proceedings, Bergmekanikdagen 2013 (BeFo, Stockholm, March 2013)***.

Stille, B., R. Swindell, C. Montelius, and C. J. Gårdingar. “Application of the active design concept for a complex excavation in hard rock, City Line – Station City, Stockholm”, in ***Proceedings of the ISRM Regional Symposium EUROCK 2012 (Stockholm, May 2012)***.

Swindell, R., and L. Rosengren. “Design and construction of an open cut in poor rock, City Line Stockholm”, in ***Proceedings of the ISRM Regional Symposium EUROCK 2009 (Dubrovnik, Croatia, October 2009)***.

Swindell, R., and U. Andersson. “Engineering geology along the planned northern stretch of the city line (Citybanan) tunnel system, north-central Stockholm, Sweden”, ***General contributions to engineering geology and geotechnics, Proceedings, 33rd International Geological Congress (Oslo, August 2008)***.

Swindell, R., and L. Rosengren. “The prediction of ground conditions for the City Line Project”, (in Swedish) in ***Proceedings, Bergmekanikdagen 2007 (SveBeFo, Stockholm, March 2007)***.

Swindell, R. “The application of 3D geological modelling for the City Line tunnel project in central Stockholm”, Presentation to the Austrian Geomechanics Society. 2005.

Swindell, R. ***Design of a Reinforced Approach Embankment over Soft Compressible Soils Using a Stone Column Solution***. MSc Thesis, University of Leeds. 2002.
