

**Project Engineer**

*Expertise* Geotechnics, Geomechanics and Mining

*Education* Civil Mining Engineer, June 2020  
*University of Santiago of Chile*

***Professional Experience***

*April 2020 – present* *Itasca Chile SpA, Santiago, Chile*  
*Project Engineer*

***Project Experience***

Civil Mining Engineer from the University of Santiago of Chile who performed his end-of-degree project analyzing a support system on a laboratory scale that has a self-supporting capacity in order to establish relationships between the main variables that define the physical behavior of the model. Also, Itasca's UDEC was used to observe the behavior of the stresses within the rock mass. He worked in the rock mechanics laboratory (CGEM) preparing and executing destructive and non-destructive geomechanical tests on intact rock.
