

## **Hydrogeology Specialist**

<b>Email</b>	<a href="mailto:fernanda.andrade@itasca.cl">fernanda.andrade@itasca.cl</a>
<b>Experience</b>	Hydrogeology and water balances
<b>Education</b>	Geologist, March 2022 Universidad de Chile
<b>Professional Experience</b>	
June 2022 – Present	Itasca Chile SpA Hydrogeology Specialist

### **Project Experience**

*Fernanda has been involved in conceptual modeling projects and more recently in numerical modeling projects for hydrogeology, performing calibrations and forward analyses with the code MINEDW. The research topic of her graduate thesis was the study of variations in hydroclimatic factors and water recharge processes in fractured aquifers of the Coastal Cordillera in Chile, where she estimated future recharge conditions based on climate change projections and developed the corresponding water balances.*
