

Geology Consultant

<i>Expertise</i>	Applied Geology, Geotechnics, Geological Hazards
<i>Education</i>	M.Sc. in Mineral Resources and Geological Risks, specialty Geological Risks, September 2016 University of Barcelona – Autonomous University of Barcelona Geologist, November 2009 University of Chile
<i>Professional Experience</i>	
<i>Sept 2020 – Present</i>	<i>Itasca S.A, Santiago, Chile Geology Consultant</i>
<i>2018 – 2020</i>	<i>Arcadis Chile, Santiago, Chile Project Engineer</i>
<i>2017 – 2018</i>	<i>Golder Associates Chile, Santiago, Chile Project Geologist</i>
<i>2016 – 2016</i>	<i>Catholic University of Temuco, Temuco, Chile Professor of Geological Risk Modeling and Management.</i>
<i>2010 – 2015</i>	<i>Arcadis Chile, Santiago, Chile Project Engineer</i>

Project Experience

Projects include geology applied to engineering in the areas of mining, environment, and infrastructure, both in environmental impact studies (EIA) and in conceptual, basic, or detailed engineering, developing geomorphological, geological, and geotechnical characterizations and geological hazard analysis. She also has worked in the definition and supervision of prospects, such as drilling and pits. Within the area of geological hazards, her experience has been mainly concentrated in landslides analysis.
