

Geotechnical Engineer

Expertise** **Soil and rock mechanics, numerical simulation.

***Education** Geological Engineer (2012),
National University of Engineering (Perú)*

*M.Sc. Geotechnical Engineering (candidate),
National University of Engineering (Perú)*

Professional Experience

*Nov 2019 – Present Itasca-Perú S.A.C, Lima, Peru.
Geotechnical Engineer and Legal Representative*

*Aug 2012 – Oct 2019 Anddes Asociados SAC.
Geotechnical Engineer*

Project Experience

Jair Olivares is a Geological Engineer from the National Engineering University in Lima and candidate of a Master of Science degree in geotechnical engineering from the National Engineering University, Perú. His expertise focuses on tailings disposal, numerical analysis, foundation design, and soil reinforcement with geosynthetics. He has performed numerical models for the stability analysis of different structures such as dams, waste dumps, heap leach pad facilities, open pits and others for different civil and mining projects. Jair is fluent in Spanish and English.
