	Software Engineer

Project Experience

Created the iOS app that eventually became Citrix Secure Hub. The app is the central piece in the Citrix Endpoint Management of iOS devices, encompassing device management (MDM), application management (MAM), and workspace access control.

Developed the first version of DroneMobile on iOS. DroneMobile is one of the earliest remote vehicle access apps to lock, unlock, and start your vehicle from your smartphone. CES awarded DroneMobile a "Best of Innovation" award for that version.

Created several Integrated Development Environments (IDE) for reporting software companies.

Developed PDF converters to export reports to a standard shareable format.
